Yes

### **What technology or markets do you focus on?**

Fluid power, automation and integration, electronic motion control, fluid conveyance, fluid process, contamination control, and electronic and hydraulic component repair.

### **Describe your company culture**

Our rich history of servicing customers in OEM & MRO markets for Industrial & Mobile Applications begins with our roots as North America's largest distributor for Fluid Power & Motion Control solutions. Our solutions-based approach to distribution combined with our experienced technical experts quickly gained a reputation of trust by our customers as an extension of their team. As technology innovations continued to integrate across

applications, our customers looked to us to provide a full-service partner that can provide the technical expertise that supports their needs. Over time, our business has evolved beyond Fluid Power and we've expanded our offering to provide customers with solutions in Fluid Process, Fluid Conveyance, Industrial Sales, and Service & Repair with the same level of technical expertise. That's what we like to call the SunSource Advantage.

SunSource values fresh minds with an entrepreneurial spirit. Our Sales Development Program, technician training, and on-going professional development opportunities make SunSource a place that you can learn and grow in your career.
