Describe your company culture

Thermal Transfer Products (TTP) is a global provider of advanced thermal transfer solutions, delivering industry-leading performance, best-in-class lead times, and the highest quality across a wide range of industrial and mobile applications. Founded in 1969, TTP specializes in a complete line of catalog-based air- and water-cooled products serving mobile and industrial hydraulic markets. Our capabilities include the design and manufacture of shell-and-tube water coolers, copper tube/aluminum fin and brazed aluminum air-cooled units, as well as custom engine cooling packages for small- to medium-sized mobile equipment. Our success is rooted in a corporate culture defined by reliability, innovation, and a commitment to excellence. From our technologies to the talented people behind them, everything we do is driven by performance and a focus on customer success. As a customer-centric industry leader, TTP provides an extensive portfolio of high-performing standard and custom heat exchanger solutions, delivered on time to meet the demands of diverse industries. We ensure our customers receive efficient and reliable thermal solutions when they need them most. Our mission is brought to life by highly engaged associates who are passionate about their work and committed to continuous improvement. Supported by superior digital tools that make doing business

easier, our teams combine deep engineering expertise with a drive to solve complex challenges—consistently delivering the right solutions for our customers.
